P.S. Flat on back - phlebitis - just when I have a book coming out & other work... Except for this, I no longer care what they do & do not write credit on ethical & moral grounds. No publication has done anything really helpful & not disfigured me in one ways. All the self promotions rip off & get nothing here. Seen counter productive where it now counts - Congress mgt. media. Those nuts/wolves have hurt. They don't know the fact and are readily rebutted in private by the agencies. Destroys all credibility. Dirty politics pairs relevance of the now irrelevant. Safe commercial is in but no harm when it counts today.

Edward Committee example. Leave us those. He liked the mock and what could have been created to some thing is a lousy. Laid stake egg. Tell the kind of stuff you sent Edwards is foolish, and detail the wrong approach. This is a different race - in all ways. Edwards was not in touch with me about them

Ah, you young fogies!

Post mortem will be sent down. It is longer - take up, will be $10.75 by insured mail, I'll have that time & ability to prepare a flyer to be mailed out

PH has been talking about Lufkin's one real accomplishment for years. Report is finally out. The kind of nasty stuff he has done can be published. Paid him advanced mine & mine to shut up/give. He has also been unconscionably unethical. Like saying he did articles in mine as his own & before it happened. It made a most helpful situation.

Best regards

JM
